## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 2000-226572 (herein after JP 572).

JP 572 discloses a technique wherein a porous silica having a surfactant micelle as a matrix is made to support a functional molecule, characterized in that the aforementioned surfactant is not removed, and the hydrophobic portion of the aforementioned surfactant is used (see especially paragraph [0019]). JP 572 discloses using the mesopores of a porous silica having a surfactant micelle as a matrix and both address the common problem of maintaining the stability of the mesopores.
